

Single-chunk confirmation

One approved chunk

Only claim class A is available.

Original ambiguity gate

Only one class clears the test:
no competing class.

Answer path remains open

Whole-corpus regression

Several approved chunks

A: strongest relevant region
B: weaker, different claim class

Same ambiguity gate

A and B both clear coverage:
treat as competing claims.

Return clarification

Recorded diagnostic

6,973 / 10,000 cases clarified. In the 100-case probe, 84 retrieved the correct region first; 69 still clarified. This motivated dominance-scoped comparison.
